

Vision Rx Lab Private Limited

Corporate Social Responsibility Policy

As per Sec 135 of the Companies Act 2013

Preamble

Vision is one of the most empowering senses of human body that not only enables a person to work to his or her fullest potential but is absolutely crucial to living a normal life.

Out of the world population of more than 7 Billion, nearly 2.5 Billion people suffer from uncorrected refractive errors. It is also found that correction of this error would lead to increase in productivity of working men and women by 34% and workers' income by 20%. World Health Organization estimated that India loses about USD 37 Billion annually because of uncorrected refractive errors.

In fact, 80 per cent of all visual impairment can be avoided or cured. India being a largely populated country certainly requires attention in this regard. About 495 million Indians require vision correction.

GKB Rx envisages bridging this gap through CSR contributions.

Organization

We have a CSR Committee that provides oversight of CSR policy execution to ensure that the CSR objectives of the Company are met. Our CSR committee comprises:
